Extension is Everywhere

Extending Knowledge, Creating Prosperity

FEEDING OUR FUTURE

NC State Extension connects growers with research-based information and technology. We actively help keep North Carolina's \$87 billion agriculture industry growing and sustainable.

IMPROVING OUR HEALTH

Extension educational programs range from local foods and home gardening to food safety and food preservation. We help people make healthier decisions and live better lives.

ENRICHING OUR YOUTH

Extension's 4-H program is the largest youth development organization in North Carolina. We help hundreds of thousands of young people grow into active, contributing citizens each year.
